EXAMINER'S AMENDMENT AND COMMENT

1. Restriction to one of the following inventions is required under 35 U.S.C.

121:

- I. Claims 1-20, drawn to a multiple power engine system with degradation, classified in class 123, subclass 319.
- II. Claim 21, drawn to a multiple power engine system, classified in class 123, subclass 52.1.

The inventions are distinct, each from the other because of the following reasons:

Inventions of Group I and Group II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because degradation is not required in Group II. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

During a telephone conversation with Constanine Marantidis on 6-18-04 a provisional election was made without traverse to prosecute the invention of Group I, claims 1-20.

The application has been amended as follows:

Cancel claim 21 non-elected without traverse.
